

Mobilise your
workforce and
increase productivity
with AsdeqDocs

**The smart mobile
document solution**

AsdeqDocs, a part of the AsdeqWorkforce Suite

Mobile devices are changing the way we do business.

Smartphones and tablets are enabling us to remotely connect to the workplace, promising increased productivity and flexibility for employees and organisations across a wide range of industries.

However today's firms need to think beyond simple mobile email in order to maximise the benefits of enterprise mobility.

AsdeqDocs is a secure, fully integrated enterprise solution that allows mobile users the ability to access the documents and files they need, on any device, no matter where they are. AsdeqDocs interfaces directly with your organisation's existing file and document stores to provide a seamless, integrated and secure end user experience.

With AsdeqDocs, the mobile office is now truly within your grasp.

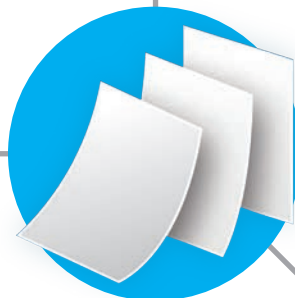

**Enterprise Mobile
Document Management**
seamless | integrated | secure

Secure mobile document management

Mobilise your workforce and increase productivity

AsdeqDocs is an enterprise-ready business solution that solves the problem of secure mobile document management.

Integrating directly with the corporate systems you currently use to store your documents, AsdeqDocs provides access to whatever you need, whenever and wherever you need it, regardless of whether you are online or offline. And all this is achieved with unparalleled security, ensuring your information is protected at all times, even if your mobile device is lost.

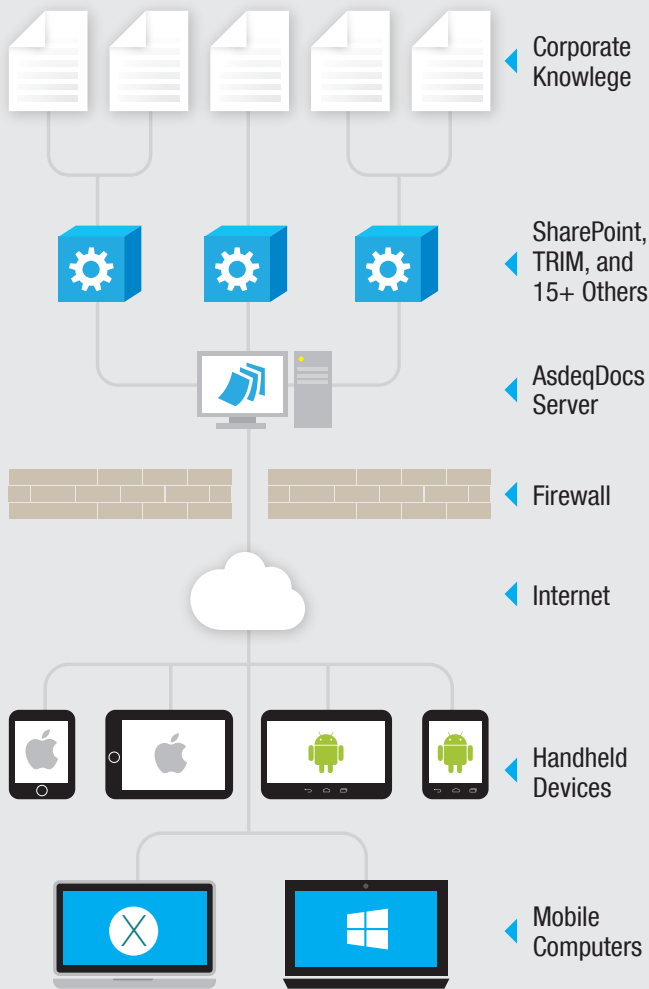

Mobility with ease and accuracy

AsdeqDocs provides complete mobility, without changing the way you or your employees work. Users have access to the full range of tools normally only seen in desktop applications – and this means increased productivity with ease.

- Browse, search, organise, edit and annotate documents on the go
- Fast secure access to all documents including Office, PDF, video and audio files
- Rapidly find files by searching for keywords or phrases
- Always have the latest version of all your documents
- Fully functional online and offline

**Access the documents you need
anywhere, anytime**

With AsdeqDocs you don't need to change the way you manage or store your documents to benefit from the productivity gains that mobility brings.

AsdeqDocs provides a direct channel to your existing environment, seamlessly integrating with 17+ document repositories including Sharepoint™, Outlook™ and TRIM™. Information is synchronized securely across all tablets, smartphones and laptops.

Unparalleled security

- No separate security configurations are required – AsdeqDocs automatically uses both AD/LDAP and repository permissions
- Secure network connections for data transfer, with customised encrypted data storage on all devices
- Enterprise level control over user access to read, transfer, edit, share, print or email documents
- Comprehensive audit logging provides visibility on user activity
- Remotely wipe all documents from any mobile device in an instant, protecting your data and IP even when a device is lost

ASDEQDOCS DELIVERS
THE ESSENTIAL MOBILE DOCUMENT MANAGEMENT

- 1 Access your documents when and where you need**
Complete mobility, regardless of where you're working or where your documents are stored.
- 2 A common interface across all devices**
Smartphones, tablets and laptops – a powerful, intuitive application working consistently across Android, iOS, Windows and MacOS.
- 3 Security & privacy**
Military grade security safeguards your data. Control access, assign permissions and track usage.
- 4 Work online and offline**
Full access and productivity, online and offline. Files update automatically when you log on.
- 5 Searchability - inhouse and in the cloud**
Powerful search function scans across thousands of documents, networks and repositories. Locate the file you need in seconds.
- 6 Read, annotate and edit**
Built-in tools for marking up and editing with ease, on all devices.
- 7 Integrate with existing document repositories**
Native integration with 17+ existing repositories provides mobility without changing how you work.
- 8 Get up and running quickly**
Easy set-up, rapid deployment and minimal end user training – your organisation becomes more productive quickly.
- 9 Accurately displays Office documents**
High quality mode means Office documents look the same on your mobile device as your desktop.
- 10 Multiple industries**
Government, utilities, finance, resourcing and any organization where staff need secure, instant access to their documents.

“...push technology that puts all of the curated content on your device and updates automatically every time you log on.”

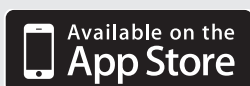

Transform the way you do business.
